Western Digital is in the midst of a wave of upgrades to its 1TB lineup, which currently consists of the WD Blue, My Book Live, and My Book Duo. Now, the company has announced an 8TB version of the My Book Live. The 8TB My Book Live reads at 5,400rpm and writes at 5,400rpm, or 50MB/s. Its 8TB version is faster than its 6TB iteration, which can read and write data at 45MB/s. The 8TB version will start at \$200, and its 8TB My Book Duo costs \$300. It will also cost \$60 more than the 4TB My Book Live, but it's not clear yet if the 8TB My Book Duo comes with free shipping. Western Digital says the 8TB drive has a "customized controller" and has undergone a "formal compliance audit" from Aemtors in the UK, U.S. Department of Defense, and TÜV SÜD. Aside from the drive's performance, the only difference between the 8TB and 6TB My Book Live is that the 8TB's firmware is already optimized for data reliability. The company is so confident in the stability and performance of its new 8TB drive that it's putting it up for sale on Amazon.com — where the 8TB My Book Live is priced at \$269.99 — before it even goes up for sale in the company's stores. You can see the WD 8TB My Book Live online on Amazon, and it is also featured on the Western Digital website. Pricing, availability, and specifications for the 8TB My Book Duo and 4TB My Book Live are not yet available.Q: VS2015 requires.NET 4 f678ea9f9e
